

Title – Infor ERPLN Implementation

Messer Cutting Systems is a global supplier of cutting-edge solutions for the metal-working industry. As the technology leader in the thermal cutting industry constantly working on smarter, faster and more reliable solutions with an added value for their customers. This is what motivates Messer nearly 1,000 experienced employees in 5 main locations with production sites every day. Altogether, Messer is active in more than 50 countries.

Their product range includes oxyfuel, plasma and laser cutting systems from hand guided machines right up to special machines for shipbuilding as well as machines and equipment for oxyfuel welding, cutting, brazing, soldering and heating.

Example Product:

Description –

Under Uniform system strategy, Messer wanted to implement Infor LN in all the sites across the globe.

Challenges:

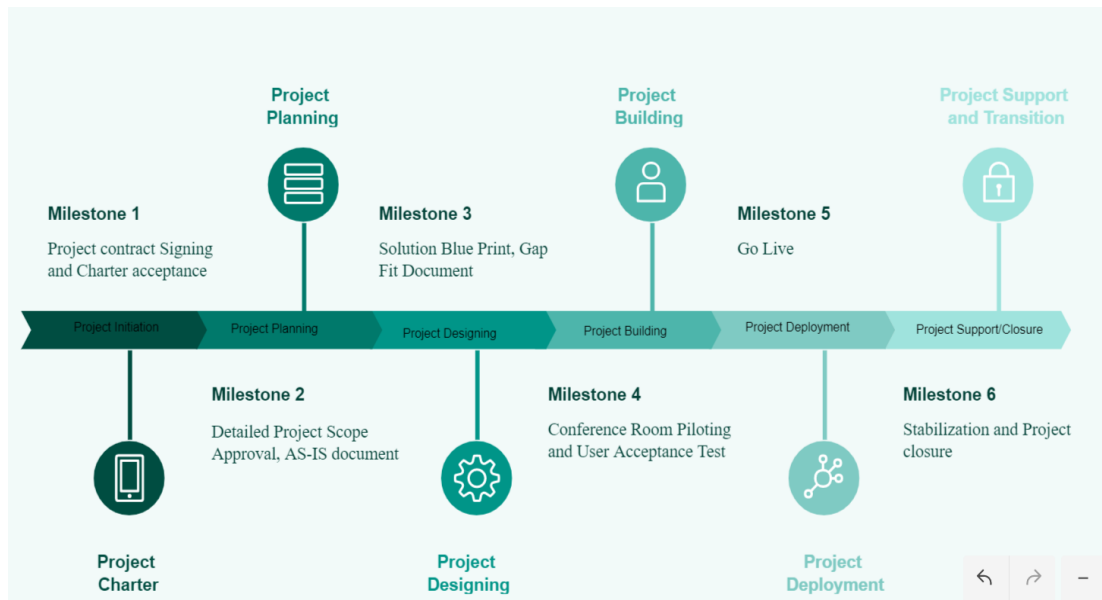

1. Home grown ERP was unable to meet their business expansion requirements
2. Planning was done manually outside the system consuming lot of time and inaccurate data
3. Manual efforts to report segmental financial data to Global Head Office
4. Unable to capture 100% accurate cost of End item
5. Automated supplier payments were not possible
6. Capturing after sale service revenue was a challenge

Solution:

Solutions Provided by the nicheBees Including the following:

- Implementation of ERP LN 10.4 in India 1 manufacturing plant and 3 distribution centres
- Implementation of Turnkey Project (TP) Module integrated with Service
- Implementation of Field Service, Depot repair, Preventive maintenance, Service Contracts, Call management, Customer Claims, Subcontracting Service.
- Interface with smart factory system that handled 100% paper less shopfloor, optimized reporting
- Development of add on customized modules for distribution requirement, planning, capacity management and nesting operation
- Gate entry customization for vehicle movement
- OneStream finance reporting integration with LN

Implementation Methodology
